## Garner Industries Awarded International Quality Management Certification

Lincoln, Nebraska – Garner Industries of Lincoln, Nebraska has been awarded ISO 9001:2015 Quality Management System certification by Orion Registrar, Inc. of Denver, Colorado.

Garner achieved certification by demonstrating their ability to consistently provide products and services that meet customer and regulatory requirements as well as a consistent commitment to enhancing customer satisfaction through consistent processes of improvement and assurance of conformity to customer and regulatory requirements. System processes evaluated included quality control related to Garner’s CNC machining, tooling and injection molding as well as level controls and sensors designed and manufactured for their BinMaster division.

“Our commitment of quality extends to all members of our team and in every facet of our business,” explains Garner President and CEO Scott McLain. “We are extremely proud to again achieve ISO certification as proof of our organizational-wide commitment to the products we manufacture, and most importantly, to the customers we serve.”

Garner Industries was first awarded ISO certification in 2006 and has since continued recertification as part of the organization’s commitment to assuring customer satisfaction.

### **About Garner Industries & BinMaster**

Founded in 1953, privately held Garner Industries of Lincoln, Nebraska has 140 employees and specializes in plastic injection molding, CNC machining, and custom tool building. The company is also the manufacturer of the BinMaster product line of level measurement sensors, material management, and data monitoring systems for bins, tanks and silos. BinMaster products are sold throughout North America and exported to more than 50 countries in the global instrumentation market.
